Canadian Metallurgical Quarterly

Volume 27, No. 1, January–March 1988

CONTENTS

CHEMICAL AND EXTRACTIVE METALLURGY

T. Iida, R. I. L. Guthrie and Z. Morita	1	An equation for the viscosity of liquid metals
A. A. Bustos, J. K. Brimacombe and G. G. Richards	7	Accretion growth at the tuyeres of a Peirce–Smith copper converter
X. H. Jiang, D. C. Lynch and W. G. Davenport	23	Evaluation of the first order ternary interaction parameter ε_{Bi}^{As} for molten copper
S. L. Cockcroft, G. G. Richards and J. K. Brimacombe	27	Mathematical model of lead behaviour in the zinc slag fuming process
Ji Chunlin, Yu Rongxiang and Liu Sulan	41	Thermodynamic activity of silicon and boron in Fe–Si–B ternary melts at 1450°C

PHYSICAL METALLURGY AND MATERIALS

C. Grobler and G. T. Van Rooyen	49	The mechanisms by which splitting occurs along sheared edges and in Charpy specimens of a 12% chromium steel
R. A. L. Drew	59	Silicon nitride and sialon ceramics—A review
T. Lau and T. H. North	65	Fusion welding of stainless steels
M. Nabil Bassim, S. Yannacopoulos and M. C. Chaturvedi	79	A study of the role of polymeric coating in preventing corrosion fatigue of steels
	I	Software Survey Section

Canadian Metallurgical Quarterly

Volume 27, No. 2, April–June 1988

CONTENTS

MINERALS AND MINERAL PROCESSING

G. S. Dobby, J. B. Yianatos and J. A. Finch — 85 — Estimation of bubble diameter in flotation columns from drift flux analysis

CHEMICAL AND EXTRACTIVE METALLURGY

T. T. Chen and J. E. Dutrizac — 91 — Mineralogical characterization of anode slimes —I. Anode copper from Inco's Copper Cliff Copper Refinery

T. T. Chen and J. E. Dutrizac — 97 — Mineralogical characterization of anode slimes —II. Raw anode slimes from Inco's Copper Cliff Copper Refinery

T. T. Chen and J. E. Dutrizac — 107 — Mineralogical characterization of anode slimes —III. Sulphation reactor slimes from Inco's Copper Cliff Copper Refinery

C. A. Pickles and J. M. Toguri — 117 — Soda ash smelting of lead chloride

P. G. Sismanis and S. A. Argyropoulos — 123 — Modelling of exothermic dissolution

W. F. Caley and S. G. Whiteway — 135 — Corrosion of refractory materials by liquid slags formed from the combustion of straw

PHYSICAL METALLURGY AND MATERIALS

A. J. DeArdo — 141 — Accelerated cooling: a physical metallurgy perspective

MATERIALS PROPERTIES AND PROCESSING

G. A. Capuano — 155 — D.C. Pulse plating and barrel electrodeposition of aluminum and aluminum alloys from alkylbenzene electrolytes

S. Yannacopoulos and M. C. Chaturvedi — 163 — Thermomechanical treatment of a titanium bearing HSLA steel

Canadian Metallurgical Quarterly

Volume 27, No. 3, July-September 1988

CONTENTS

CHEMICAL AND EXTRACTIVE METALLURGY

R. Harris — 169 Numerical simulation of vacuum refining of liquid metal

R. Merk and C. A. Pickles — 179 Reduction of ilmenite by carbon monoxide

Zongyu Li, P. V. Barr and J. K. Brimacombe — 187 Computer simulation of the slab reheating furnace

PHYSICAL METALLURGY AND MATERIALS

L. N. Pussegoda and K. E. D. Sumanasiri — 197 Comparison of two methods of cold work to increase strength of hot rolled reinforcing bar — a further study

R. J. Barnhurst — 205 Evaluation of the risering requirements for the ZA-27 zinc-base alloy

R. L. Eadie and R. R. Smith — 213 Modelling delayed hydride cracking in zirconium alloys

R. J. Barnhurst and J. C. Farge — 225 A study of the bearing characteristics of zinc-aluminum (ZA) alloys

L. T. Mavropoulos and J. J. Jonas — 235 Effect of the combined addition of niobium and boron on static recrystallization in hot worked austenite

TECHNICAL NOTE

J. H. Haberman and Y. K. Rao — 247 Chemical dissolution of lead blast furnace accretions with potassium carbonate in the presence of carbon

i Software Survey Section

Canadian Metallurgical Quarterly

Volume 27, No. 4, October-December 1988

CONTENTS

MINERALS AND MINERAL PROCESSING

S. R. Rao and J. A. Finch — 253 — Galvanic interaction studies on sulphide minerals

CHEMICAL AND EXTRACTIVE METALLURGY

N. S. Tavare — 261 — Industrial crystallization research: an overview

C. Barnes and W. T. Thompson — 267 — A determination of the thermodynamic properties of $MgCl_2$ in LiCl-containing melts from Emf measurements

Guankun Liu, J. M. Toguri and N. M. Stubina — 277 — The influence of arsenic on the activity of oxygen in molten copper

G. W. Healy — 281 — Carbon reduction of chromites in Bird River and other ores and concentrates at 1200-1700°C

J. A. Eisele — 287 — Gold metallurgy—a historical perspective

I. F. Taylor, J. K. Wright and D. K. Philp — 293 — Transient pressure and vibration events resulting from high speed gas injection into liquids

PHYSICAL METALLURGY AND MATERIALS

M. G. Akben and G. L. Wang — 303 — High temperature dynamic strengthening and softening of Nb and Mo HSLA steels containing 0.08% Al

R. J. Brigham, M. McLean, V. S. Donepudi, S. Santyr, L. Malik and A. Garner — 311 — Evaluation of weld-zone corrosion of shipbuilding steel plates for use in the arctic environment

M. Jovanovic, A. Stern, H. Kneis, G. C. Weatherly and M. Leger — 323 — Thermal diffusion of hydrogen and hydride precipitation in Zr-Nb pressure tube alloys

TECHNICAL NOTE

E. J. Grimsey and J. M. Toguri — 331 — Cobalt in silica saturated fayalite slags

Volume 27 Title Section, Contents and Author Index — i
